CROP VALUES

Season Average Prices and Value of Production, by States, 1960 and 1961

Estimated season average prices and value of production for all major farm crops and for many minor crops are presented in this report. The season average prices shown in this report are estimates of the average price received by producers for that part of the crop that is sold. Price estimates for the 1961 crop are based on sales through November with an allowance for marketings for the remainder of the season. These prices are applied to the production estimates presented in Crop Production--1961 Annual Summary to compute the value of production for each State. The United States value of production is the sum of the State values. In this report the U.S. average prices are obtained by weighting State prices by estimated annual sales. This average may differ from the average computed by dividing value of production by the quantity produced. Velvetbeans and sorghum forage are exceptions to the above general rule as very little of these crops are sold and accordingly the U.S. averages are derived by weighting State prices by quantity produced. The value of production estimates in this report relate to the crop year and they should not be confused with cash receipts which relate to sales during a calendar year, irrespective of the year of production. All estimates for the 1961 crop are preliminary.

For crops for which monthly price estimates are prepared the season average price is computed by weighting mid-month prices by estimated monthly marketing percentages. For most other crops the season average price is based on special survey data. The season average prices for corn, wheat, rye, rice, oats, barley, sorghum grain, flaxseed, soybeans, dry beans, cotton lint, and cottonseed include an allowance for unredeemed loans and purchase agreement deliveries valued at the average loan rate, by States. The 1961 price for cotton is the average price to December 1. For dry beans and dry peas the price and value estimates relate only to production of cleaned beans or peas.

Tomatoes	Cwt.	7.73	7.35	147,315	155,664
Watermelons	Cwt.	1.25	1.54	37,054	44,587
Commercial vegetables					
For processing:					
Asparagus	Ton	219.00	242.00	27,558	31,201
Beans, green lima (shelled) ..	Ton	143.00	145.00	14,797	16,910
Beans, snap	Ton	108.00	105.00	44,034	49,571
Beets	Ton	19.20	18.60	2,806	3,321
Cabbage	Ton	15.50	12.70	3,419	2,661
Corn, sweet	Ton	19.20	19.40	26,768	33,292
Cucumbers	Ton	54.70	55.90	19,001	23,405
Peas, green (shelled)	Ton	86.00	85.90	38,311	43,554
Spinach	Ton	35.60	35.60	5,127	5,110
Tomatoes	Ton	26.10	29.70	105,609	125,426
Total 78 crops ^{13/}		---	---	19,183,372	19,790,655

^{1/} United States average prices computed by weighting State prices by estimated sales except for velvetbeans and sorghum for forage, (see text).

^{2/} Not included in the total value for 78 crops shown at the end of the table.

^{3/} Ear corn.

^{4/} Price to December 1.

^{5/} Price of hay sold baled.

^{6/} Includes Alaska and Hawaii.

^{7/} Does not include Government payments under the Sugar Act. 1961 is based on average marketing prices to December 10.

^{8/} Equivalent packinghouse-door returns for all uses for citrus and for apples and pears in Pacific Coast States.

^{9/} Not available.

^{10/} Used 1960 price to evaluate production, except California grapes and figs not dried.

^{11/} Includes Alaska and Hawaii for 1960 and 1961.

^{12/} Includes some processing.

^{13/} Excludes crops indicated with footnote 2.

1/ Estimates for each State cover all-potatoes, including winter, early, & late spring, early & late summer, and fall crops where shown. The value of production for all-potatoes is the sum of the value of production of the seasonal groups. For States having two or more seasonal groups the State average price is derived by dividing value of sales by total sales and may not give the same average as dividing total value of production by total production. 2/ Some quantities not harvested or not marketed because of low prices are included in the production estimate but excluded in computing value.

1/ Estimates for the commercial crop relate to apples produced in the commercial apple areas of each State. Price and value apply only to that portion of the crop utilized.

2/ The season average price is the equivalent packinghouse-door returns for Pacific Coast States, and the price as sold for other States.

3/ Estimates discontinued beginning with 1961 crop season.
